Pacify farm update how to revive

How to beat the farm (New Update)! By Swift Farm Update Guide! Step 1: Find the bolt cutters in the house in front of you as soon as they multiply in the game, will be on the 2nd or 3rd floor (depending on the spawn)Step 2: Find angel statue top floor in the house, in front of the screed (It will be used to revive / help people who have been caught by the farmer)Step 3: Go around the map opening doors that need a screw cutter (such as a barn door and a door that has fertilizer bags)Step 4: Now ... There is an area near the back corner of the barn where there is a water source, you have to click on 'E' on it and it will let you run out of water. So after that you have to run and grab fertilizer bags from the mini house/shed near the friction and poison water. Step 5: Almost there.. Now you have to grab the pan from the kitchen in the house near the friction and hit all the chickens around you and pick them up. Then place the chicken in poisonous water and bait the farmer to eat. (It weakens him!) Step 6: After feeding the farmer 8/9 poison chickens, the farmer will fall to the floor near the screed and you must use a wheelbard to escort him to the van. (And then you win!) ps Sorry if it is not detailed enough ... A little rushed to write this whole guide ;/ Pacify farm update allows players to engage in a new mission on a new map. This quick guide explains how to find updates to the secret end. Pacify is a horror game where a player works for Paranormal Activity Helpers Incorporated (PAH) to get rid of the location of a supernatural entity. The basic game has the player enter an exceptionally old house to complete various objects in order to calm down and deal with the angry spirit of the little girl who will follow the player(s). But farm update added a whole new map to the game and paired with a new enemy and new targets. Like the basic game, there is a secret end available for players to find. So here's a quick guide on how to find him. Incapacitate farmer in Pacify As with any end, the first thing a player must do is defeat the monster and (preferably) put together clues that allude to the monster of origin. These hints indicate a box that can be used to trap evil, that water is needed to make the poison effective, old nochices that can activate magic in a windmill, etc. But the first thing the players have to do is enter the house. On the first or second floor of the house should be some screw cutters, which can be used to open the door all over the map. This includes the barn where the poison is kept. In the attic is an old trifle mentioned in one of the notes. It's an angelic statue that, when transported to a windmill, can heal wounded allies. Also grab one of the pans from inside the kitchen to kill the chickens later. Behind the house is a freshwater source that can be activated. This is the water source players need to dump poison in order to create green chickens. These green chickens can then be fed to farmers to weaken it. When enough green chickens have been fed to the farmer she will give out loud moans and start slowly limping towards the spawning area where she eventually faints. Players will need to catch the wheel in order to move the farmer around. From there, players can choose which end they want to watch. Running The Secret End in Pacify So remember that box is shown in the comments? The one that was said to trap evil and was probably the box where he held the spirit of a sticky husband? It is located in a cemetery near a windmill. Take the farmer to the box. It probably siphons off the bad food spirit inside the box and seals it off. After that, the secret end can be triggered by simply returning to the van empty-handed. But fun fact: there is a boss fighting easter egg available with this ending. When you bring a farmer into an ill-sealing box, place the green chicken inside it. Then a little light show should be-no joke-giant green chicken on the farm. He's big, neon green and comically defenseless. The biggest problem should be catching up because it runs so fast. But like other chickens on the farm, the way to beat this creature is by hitting it with a frying pan. Although, for obvious reasons, this chicken will require more wounds before it keles. But once the chicken boss clucks off on his last rest, players can then still approach the van and find their secret end.
